SECRET 50X1-HUM Comment. If the train seen in Velten on 26 September carried rocket launchers, it may have been one of the three shipments of the 90th RL Regt of the Second Gds Mecz Army which, transferred to Neustrelitz to participate in the exercises mentioned Comment 2. . On 1 October, a unit of this regiment may have returned from the exercises. However, it is also possible that units of the 31st AAA Div returned from Wustrow or also participated in the above mentioned exercises. The material observed on 30 September, possibly was a shipment of equipment for the KVP. 50X1-HUM Comment. the column probably involved units of the 6th Gds Mecz Div which, according to the composition of the column, especially the 16 heavy mortars, may have come from Eberswalde. Exercises of the division were possibly held in the Bernau area. 50X1-50X1-HUM
